

Disinfectant for Control Of Fungal, Bacterial, Viral Plant Pathogens and Algae**PRODUCT APPLICATIONS:**

Physan 20 has many applications for the home gardener, small grower, and specialty plant hobbyist. Unlike many fungicides and bactericides on the market today, which are effective only against specific types of fungi, viruses or bacteria, Physan 20 provides protection against a wide variety of pathogens on a multitude of plants and surfaces.

Hardscape, Walkways, Growing Areas

- Controls algae on walkways, bricks, cement, stucco, statuary, hardscape and water contact surfaces
- Controls algae, bacteria, viruses and fungi on benches, pots
- Controls mildew and algae growth on floors and tabletops

Fountains, Pools, Birdbaths, Ornamental Water Displays

- Controls algae and odor in a variety of home garden water displays
- Safe for birds, mammals
- Toxic to fish!
- Can be used in ponds containing plants

Orchids and African Violets

- Prevents Crown Rot, Botrytis and Root Rot on Orchids
- Prevents and eliminates damping off on Orchid seedlings
- Prevents algae growth in African Violet capillary matting and wick watering systems
- Prevents Downy Mildew on African Violets

Roses and Ornamentals

- Prevents black spot, powdery mildew, rust on roses
- Labeled for use with over 20 different ornamentals and succulents. Refer to Inserts #1 & #2, as well as the Physan 20 Mixing and Usage Guide for specific application instructions.

Tools, Buckets and Pots

- Disinfects pots, flats, and flower pots
- Disinfects cutting tools and potting implements
- Disinfects and controls odor in cut flower vases
